

Operation Brother's Keeper

Operation Brother's Keeper is a Patrol Squadron 26 initiative designed to provide knowledge, education, and the necessary skills for our assigned Sailors to appreciate how personal responsibility and decision making, in both professional and social situations, considerably impacts their lives and the lives of their fellow Tridents. The program's target audience is Sailors 25 years old and under, and primarily focuses on, but is not limited to, their regard for drink and driving preventative measures.

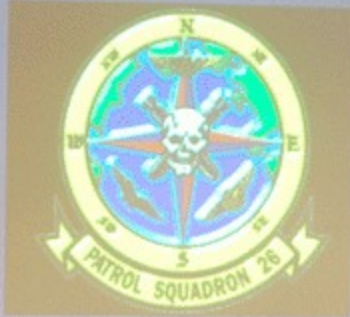

Our goal is to develop and sustain an atmosphere of responsible decision making among Trident Sailors. It is imperative that this program achieves success. Our goal of keeping our Sailors safe is the end result of a process which begins with our efforts in guiding them in a positive way.

Ultimately the individual must make his own decision.

It is our objective to arm each individual with the knowledge and necessary skills to make each
